

QUALITY, PRODUCT SAFETY AND ENVIRONMENTAL POLICY

FOLPLAST Spółka z ograniczoną odpowiedzialnością, carrying out the manufacturing processes of plastic products, is fully committed to producing the products at the highest quality level, ensuring their safety and authenticity. At the same time, the Company organises all processes in a manner that limits the negative impact of its operations on the environment.

The primary objective of FOLPLAST Spółka z ograniczoną odpowiedzialnością is to meet the applicable legal, normative and other requirements concerning quality, product safety and environmental protection, as well as to satisfy the needs and expectations of customers, in particular with regard to high quality and health safety of products intended for food contact, while striving to conduct business in an environmentally friendly manner.

Certification, implementation and continuous improvement of the Integrated Management System in accordance with the requirements of PN-EN ISO 9001:2015, PN-EN ISO 14001:2015 and the BRCGS Packaging Materials standards ensure increased customer confidence and strengthen the position of the company and its products on the market.

We implement our Quality, Product Safety and Environmental Policy by setting strategic objectives and monitoring them systematically. The most important of these objectives are:

- ensuring the high quality and health safety of products intended to come into contact with food;
- constant concern for the safety of the process of purchasing, storing, transporting and distributing products that come into contact with food;
- striving for complete customer satisfaction;
- building partnerships with customers and suppliers by learning about their needs and expectations;
- comprehensive and timely execution of orders;
- raising the qualifications and awareness of employees and managers in terms of quality, product safety and the environment, taking into account climate change issues;
- selection of subcontractors and suppliers meeting safety, quality and environmental requirements;
- rational use of natural resources;
- aiming to increase the use of renewable energy sources;
- rational management of infrastructure, materials and waste;
- investing in innovative, green technologies and knowledge-intensive services;
- planning activities in the area of development and continuous improvement of safety, quality and environmental culture;
- development and implementation of new products based on technological and environmental innovations.

FOLPLAST Spółka z ograniczoną odpowiedzialnością is aware of the importance of climate change and biodiversity protection issues in the strategic environmental impact assessment. The company declares that biologically valuable areas are not and will not be used in its operations, and that processes are planned and implemented in accordance with the principles of sustainable development.

The Integrated Management System Policy is communicated, understood and known to all employees of FOLPLAST Spółka z ograniczoną odpowiedzialnością and made available to all interested parties.

This Policy is implemented and maintained, as well as reviewed annually to ensure its continued relevance, adequacy, and effectiveness.
